

SCIENCE

Psychology

10PSY

SUBJECT DESCRIPTION:

This unit focuses on introducing Psychology as the scientific study of thoughts, feelings and behaviour. Students will explore the nervous system, how personality is expressed and measured, as well how attitudes and behaviour are shaped in the online space. Students will also conduct research and apply their knowledge to analyse data from their investigations.

After completion of this course, students will be able to:

- describe the structure and function of the nervous system
- apply the scientific method to conduct research in Psychology
- critique representations of disordered personality in popular media
- Read and respond to case studies and scientific articles
